

The background features a repeating pattern of various geometric shapes, including circles, squares, triangles, and crosses, rendered in different shades of blue and purple. The shapes are scattered across the entire background, creating a vibrant and abstract visual texture.

Post Alignment

Post Alignment Grid ▾

- Grid**
Grid is the standard tile grid layout. The grid automatically adjusts post rows based on your screen size.
- Single**
Single is just a simple stream of single posts. This works in conjunction with a text based adjustment, *Single Post Size*, by default this is set to 800.
- Adjusted**
Adjusted posts are from 1 post to 6 post rows. The individual posts change their size based on your screen size.

| Photo Post Texture Opacity | .2 |

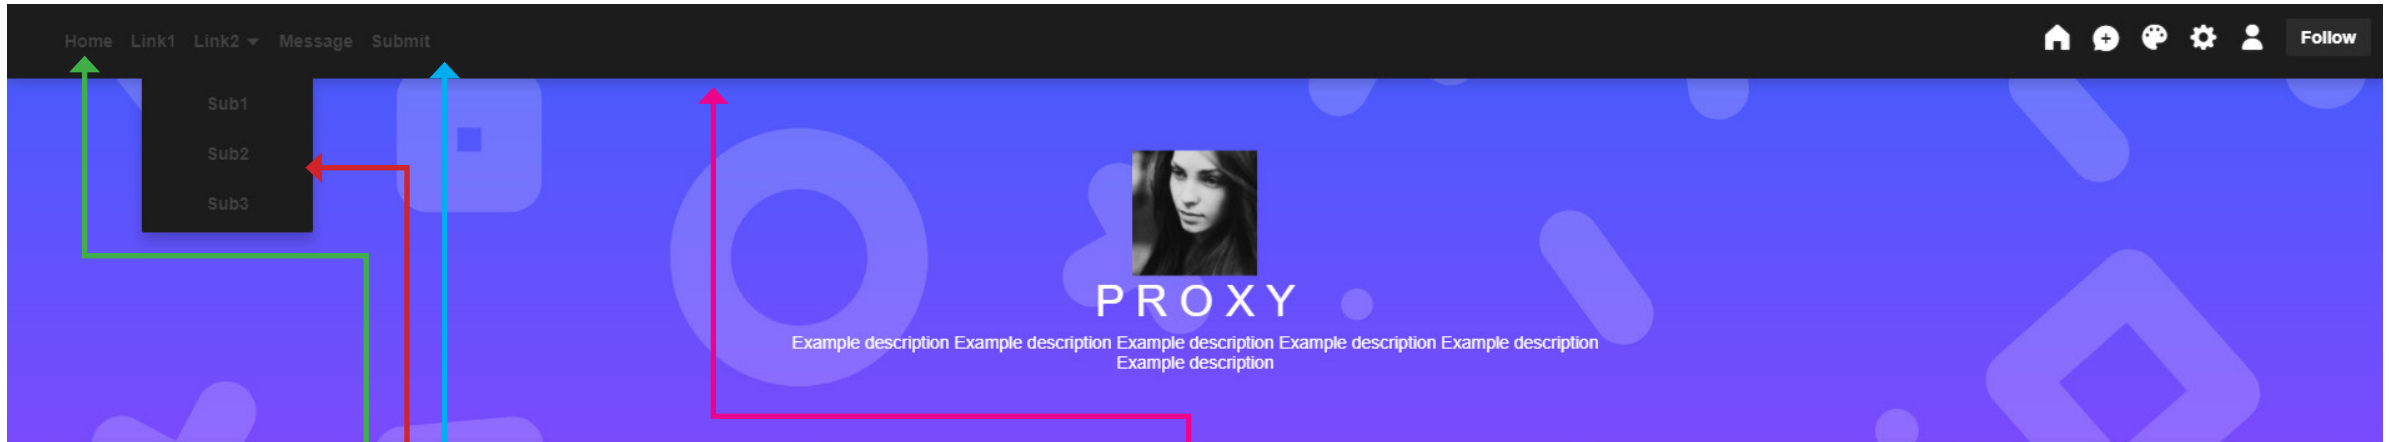

- Photo Post Hover Transition Speed**
This is the speed that the photo post layout hover effects transition.
- Photo Post Texture Size**
This is the size of the photo post layout textures.
- Photo Post Texture Opacity**
This is how opaque you want the photo post layout texture.

Post General Text Inputs

Navigation Bar (Colours)

A design system table with six rows of color swatches. To the right is a preview of a navigation bar with the 'pr-xy' logo and the same links as the top screenshot. Colored arrows connect the swatches to the corresponding elements in the navigation bar: a blue arrow from 'Navigation Bar' to the bar background, a red arrow from 'Navigation Drop Menu' to the dropdown menu, a green arrow from 'Navigation Link' to the 'Home' link, a green arrow from 'Navigation Link Hover' to the 'Link2' link, and a pink arrow from 'Navigation Blog Title or Name' to the 'pr-xy' logo.

| | |
|----------------------------------|---|
| Navigation Bar | ● |
| Navigation Bar Secondary | ● |
| Navigation Blog Title or Name | ○ |
| Navigation Drop Menu | ● |
| Navigation Link | ● |
| Navigation Link Hover | ● |
| Navigation Link Background Hover | ● |

A table with two rows of text adjustments for menu shadows.

| | |
|--------------------------------|---------|
| Navigation Menu Shadow | 0, 0, 0 |
| Navigation Menu Shadow Opacity | .2 |

Text Adjustments For Menu Shadows

To change the colour of the navigation shadow or its opacity these text adjustments are what you're looking for.

Navigation Bar Selection Options

| | |
|-----------------------------|---------------------------|
| Navigation Menu Colors | Top Navigation Bar Single |
| Navigation Menu Type | Top Navigation Bar |
| Navigation Positioning | To Left |
| Navigation Logo Positioning | Logo to Left |

Navigation Menu Colours

Top Navigation Bar Single keeps the navigation bar to only one colour.

Top Navigation Bar Two Colors makes the navigation bar change colour when you scroll past the header. This works in conjunction with the below colour option:

Navigation Menu Type

This has two options, *Top Navigation Bar* and *Sidebar*. You can have either a top navigation bar or a sidebar with this theme and it is changed with this.

| | |
|---|----------------------------------|
| Navigation Bar Secondary | <input checked="" type="radio"/> |
| Navigation Blog Title or Name Secondary | <input type="radio"/> |
| Navigation Drop Menu Secondary | <input checked="" type="radio"/> |
| Navigation Link Secondary | <input type="radio"/> |
| Navigation Link Secondary Hover | <input type="radio"/> |
| Navigation Link Secondary Background Hover | <input checked="" type="radio"/> |
| Drop Navigation Link Secondary | <input type="radio"/> |
| Drop Navigation Link Secondary Hover | <input type="radio"/> |
| Drop Navigation Link Secondary Background Hover | <input checked="" type="radio"/> |

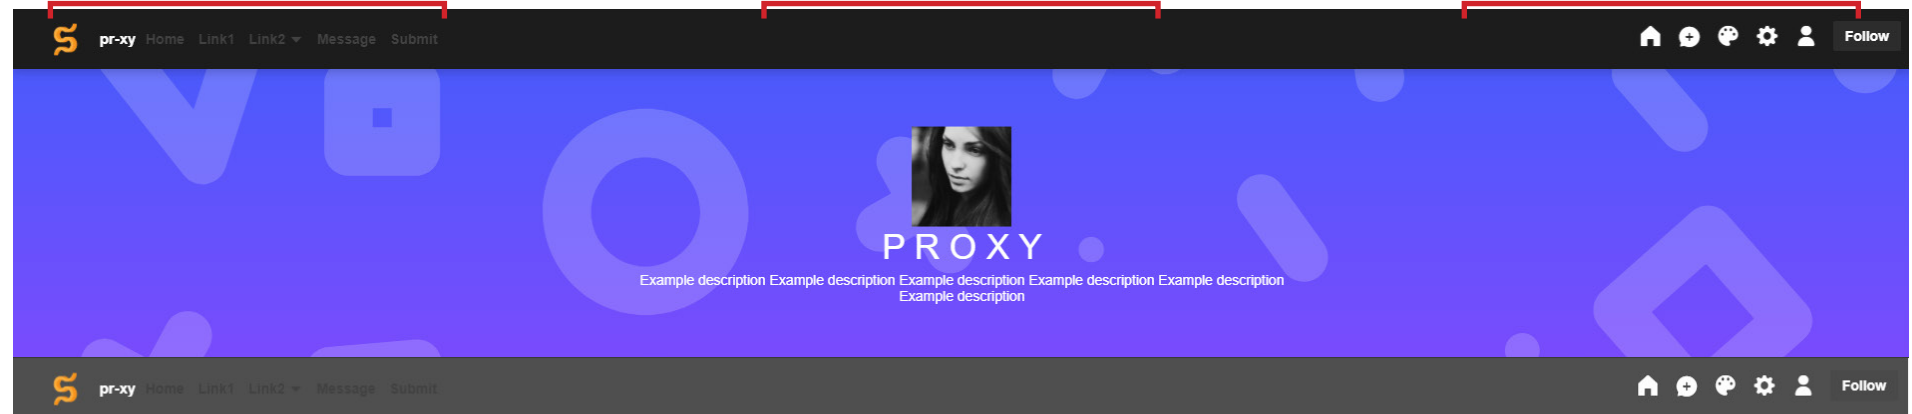

Secondary Navigation Colours

These are the same as the standard navigation colours but they apply when using the *Top Navigation Bar Two Colors* in the *Navigation Menu Colors* drop down selection.

To Left

To Center

To Right

Navigation Bar Selection Options

| | |
|--------------------------------------|----------------------|
| Navigation Logo And Name Positioning | Logo Left Name Right |
| Navigation Blog Name or Title | Name |
| Navigation Name or Title Case | Standard |
| Navigation Hover Styles | Standard |

Navigation Logo and Name Positioning

This set of options controls where the logo and name will be placed. It can be on the left of the navigation menu or to the right.

The Detached options signify that it can be completely independent of the navigation menu items and be positioned all the way to the right, the center or the left.

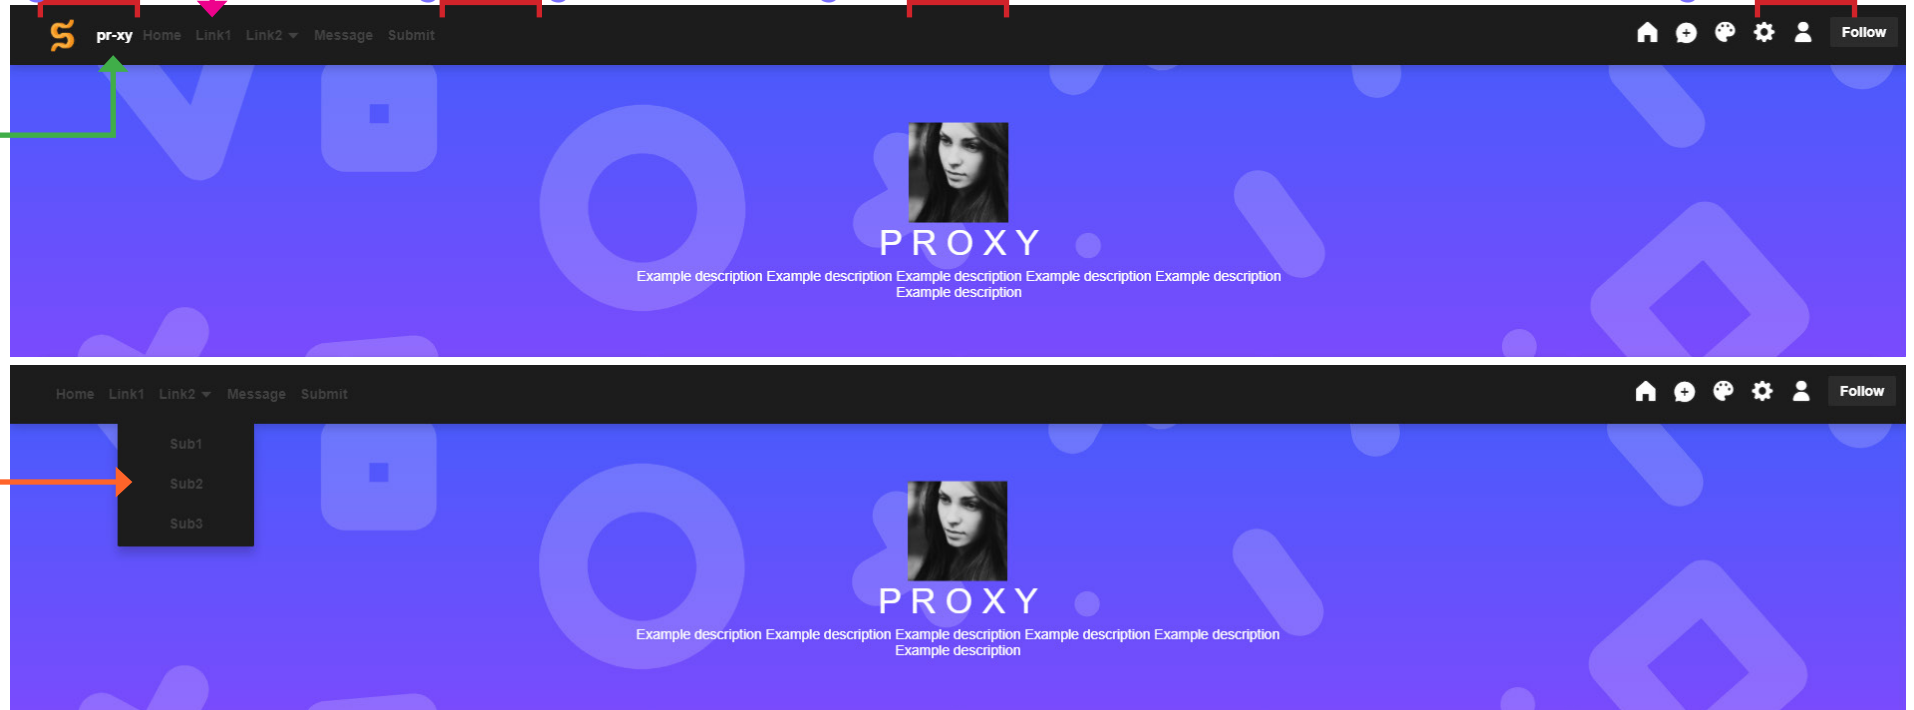

Bare in mind that some logo detachments won't work depending on where you have your navigation. If you have your navigation to the left and you detach left it won't actually do anything.

Logo To Left

Logo To Right

Logo Detached Center

Logo Detached Right

| | |
|-----------------------------|--------------------------|
| Sub Navigation Hover Styles | Standard With Background |
|-----------------------------|--------------------------|

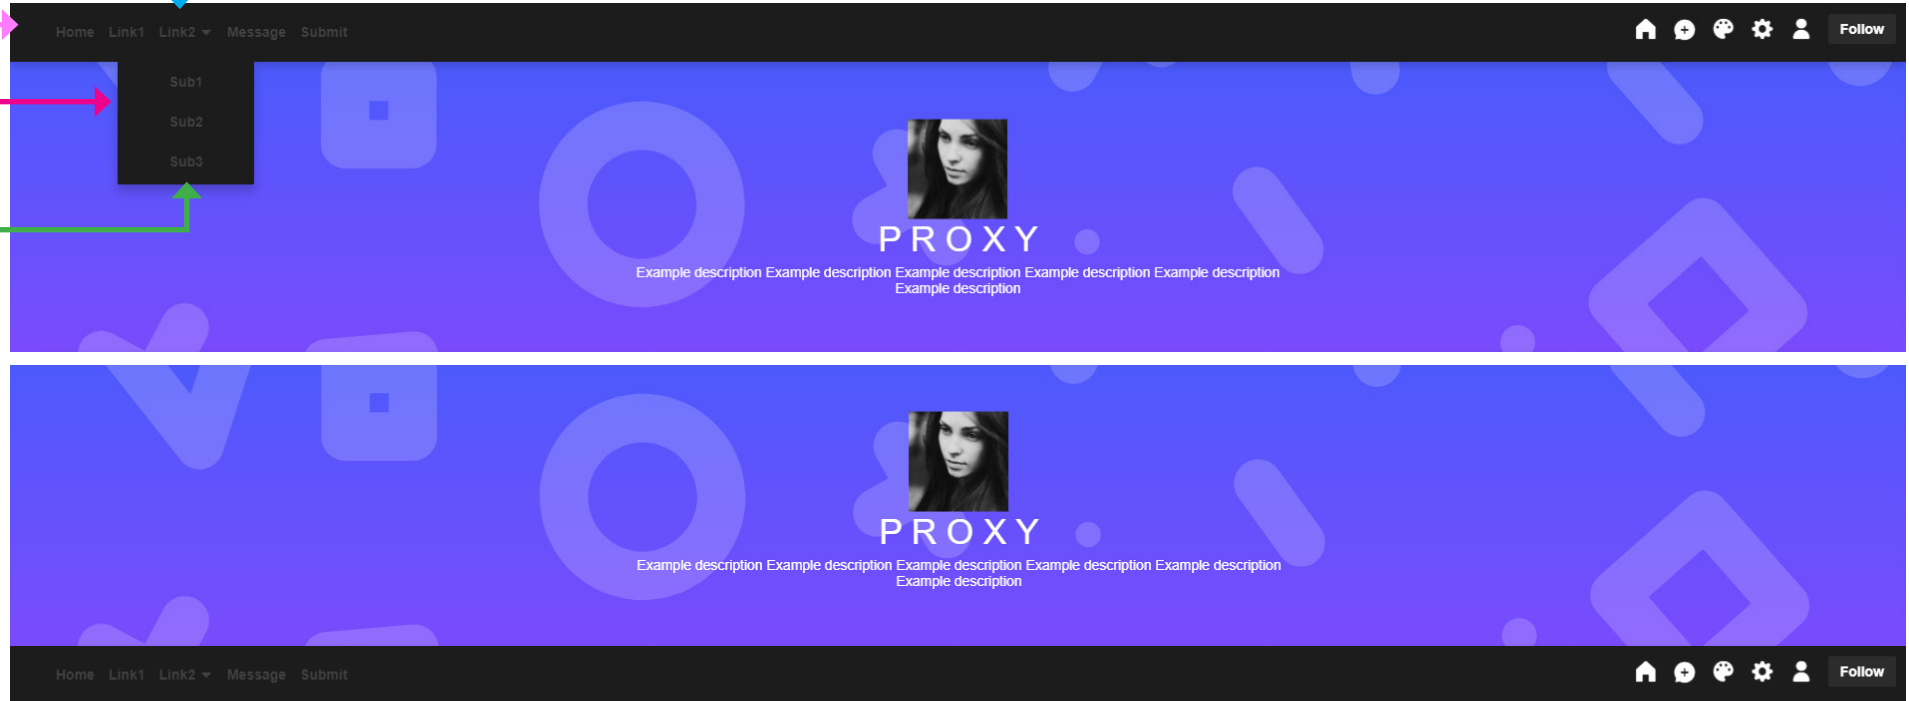

Navigation Bar Selection Options

| | |
|---------------------------------------|-------------------------|
| Navigation Drop Menu Toggle Type | Click |
| Navigation Drop Menu Transition Style | Standard |
| Navigation Drop Menu Link Alignment | Center |
| Navigation Position | Navigation Above Header |

Navigation Drop Menu Toggle Type
The toggle type is how you interact with drop menus, if it's a click toggle then you click on the menu item that opens it. It can also be set to hover.

Navigation Drop Menu Transition Style
This set of options indicates how you want to drop menu to open when you toggle it.

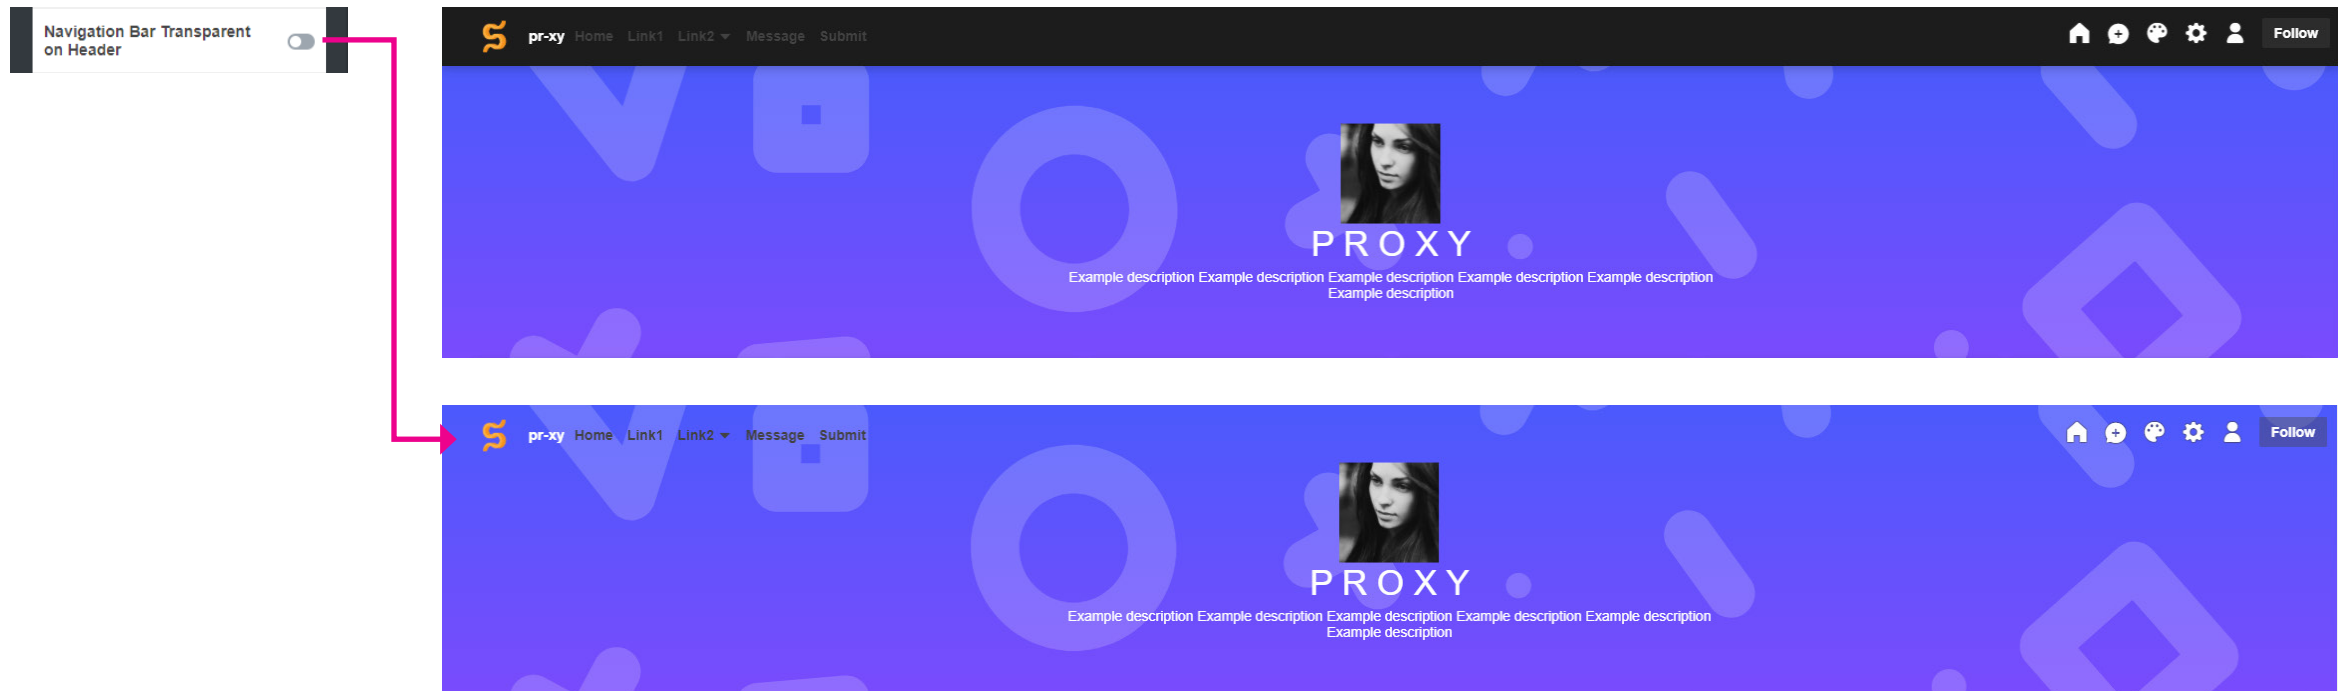

Navigation Position
Either the navigation bar can be above the header or below it.

| | |
|------------------------|-------------------|
| Navigation Bar Setting | Navigation Sticky |
|------------------------|-------------------|

Navigation Bar Setting
This can be set to sticky which will leave it at the top constantly as you scroll. Static will leave it where it is and Sticky After Header will make the navigation bar stick to the top after you've scrolled past the header.

Navigation Bar Booleans

Navigation Bar Transparent on Header

This will only work if the header is enabled. If the navigation bar is transparent it will go to a solid colour after scrolling past the header (if the navigation is sticky in some way).

Navigation Bar Text Inputs

Header Images

Header Image 1-5

If only one header image is used then only one will be displayed.

If more than one header image is used then it will perform a slideshow of all of the images you've selected.

Header Colours

The diagram illustrates the configuration of header colors for a user interface. It features two examples of a header section and a configuration panel on the left.

Configuration Panel (Left):

- Header:** Selected (indicated by a blue dot).
- Header Avatar Border:** Unselected (indicated by a white dot).
- Header Info Text Color:** Unselected (indicated by a white dot).
- Header Background Primary Gradient:** 122, 75, 252.
- Header Background Secondary Gradient:** 75, 90, 252.
- Header Gradient 1:** 0, 0, 0.
- Header Gradient 1 Opacity:** 1.
- Header Gradient 2:** 0, 0, 0.
- Header Gradient 2 Opacity:** 0.

Header Examples (Right):

The top example shows a header with a blue gradient background. The configuration panel is set to 'Header' (selected), 'Header Background Primary Gradient' (122, 75, 252), and 'Header Background Secondary Gradient' (75, 90, 252). The bottom example shows a header with a dark blue gradient background. The configuration panel is set to 'Header' (selected), 'Header Gradient 1' (0, 0, 0), 'Header Gradient 1 Opacity' (1), 'Header Gradient 2' (0, 0, 0), and 'Header Gradient 2 Opacity' (0).

Header Colour

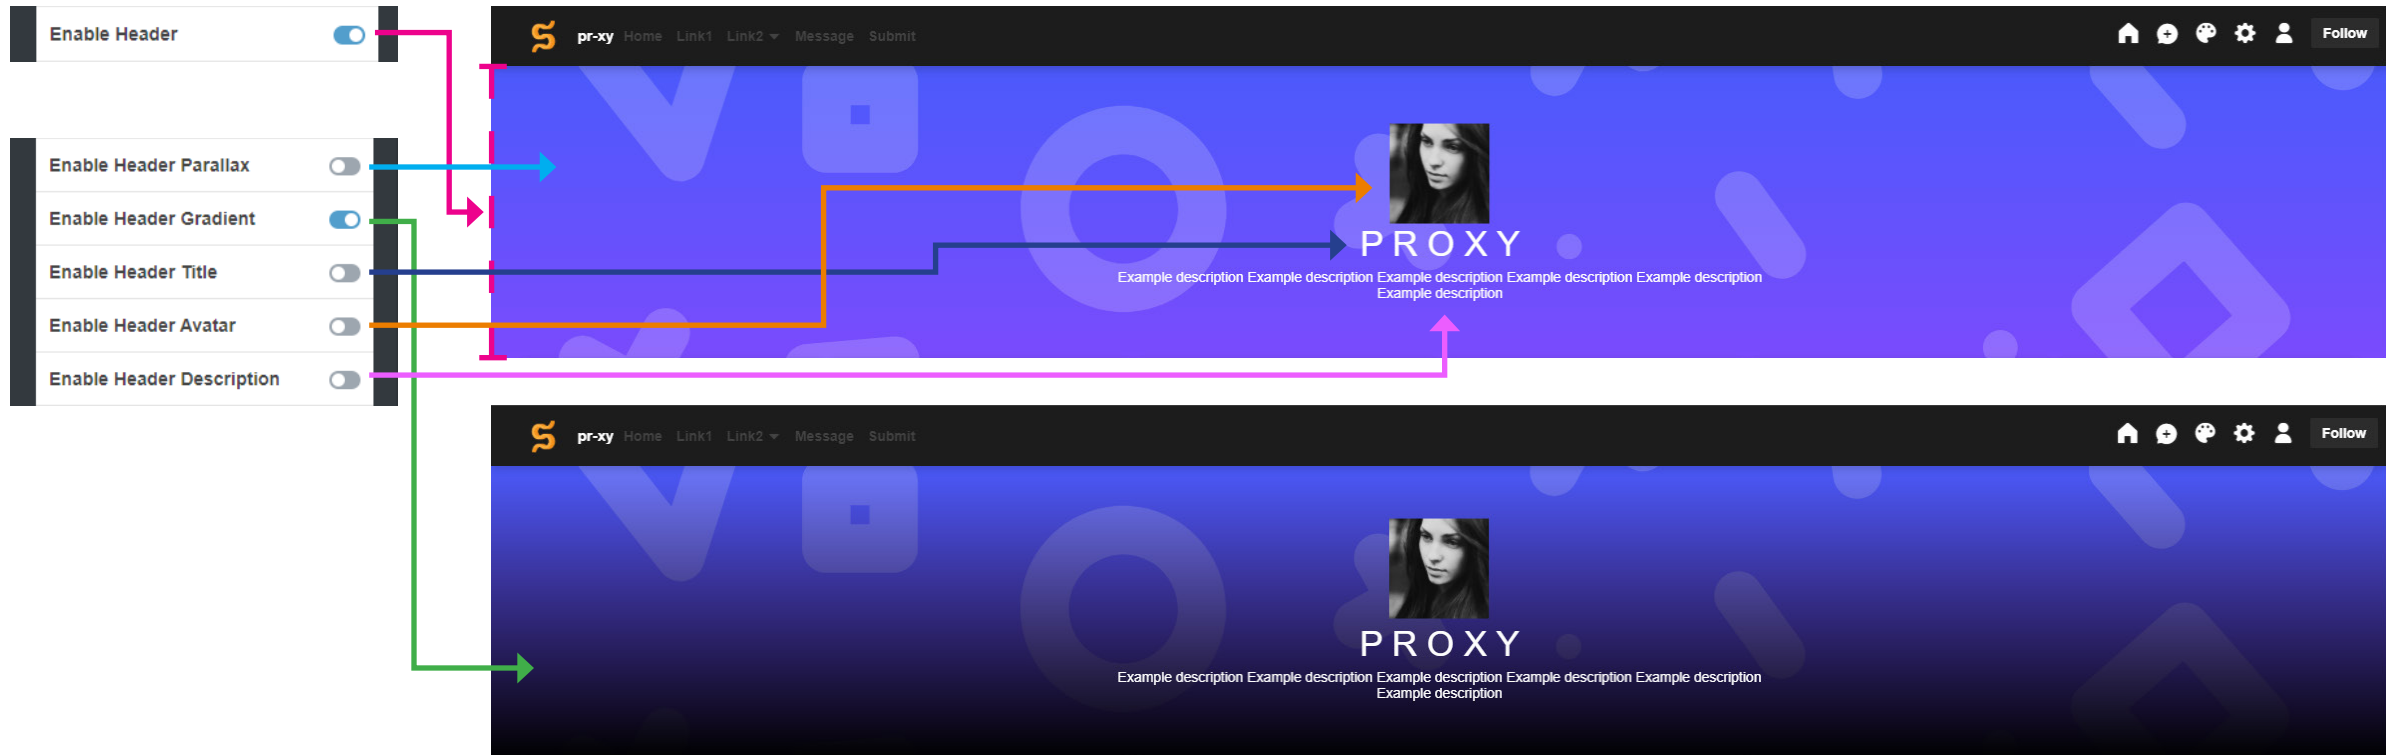

This colour works in conjunction with the selection list item *Header Background*, it can be switched to either a solid colour or a gradient.

Header Selection Options

| | |
|---------------------------|---------------------|
| Image Slider Type | Shuffle |
| Header Gradient | Always Present |
| Header Background | Gradient Background |
| Header Gradient Direction | Bottom to Top |
| Header Content Alignment | Center |
| Header Title Style | Standard |

The image displays two examples of a website header, illustrating different styling options. The top example shows a header with a blue gradient background, a profile picture, and the word 'PROXY' in a standard font. The bottom example shows a header with a dark blue gradient background, the same profile picture, and the word 'PROXY' in a standard font. Colored arrows connect the styling options in the table to the corresponding elements in the header examples.

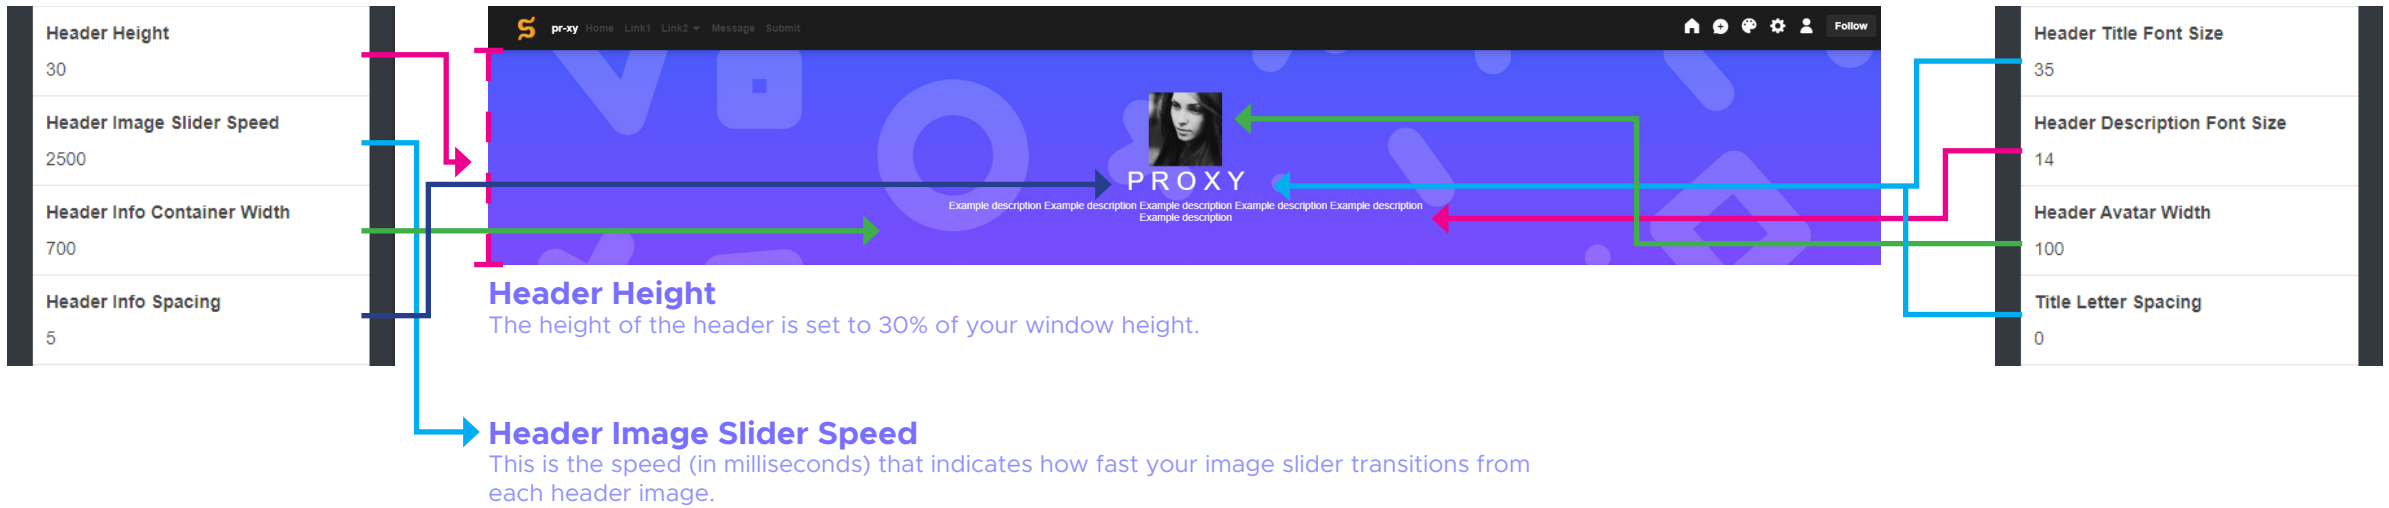

Header Booleans

Enable Header Parallax

For those who don't know what parallax is, it is an entirely aesthetic option which makes the header image scroll down at a slightly slower speed than the rest of the page, it creates a sense of depth.

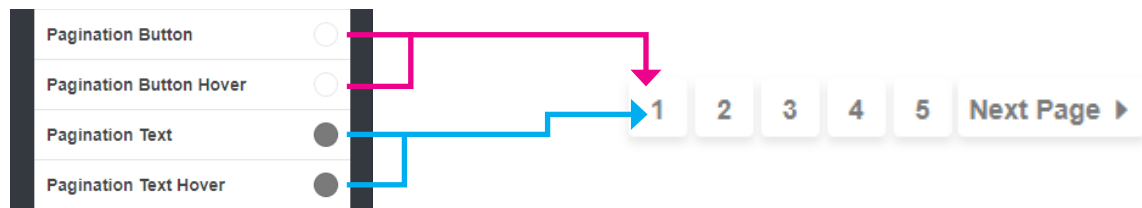

Header Text Inputs

| | |
|---|--------------|
| Header Background Primary Gradient | 122, 75, 252 |
| Header Background Secondary Gradient | 75, 90, 252 |
| Header Gradient 1 | 0, 0, 0 |
| Header Gradient 1 Opacity | 1 |
| Header Gradient 2 | 0, 0, 0 |
| Header Gradient 2 Opacity | 0 |

Header Gradients
See the header image section for info about this.

Pagination Colour

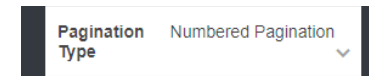

Pagination Text Inputs

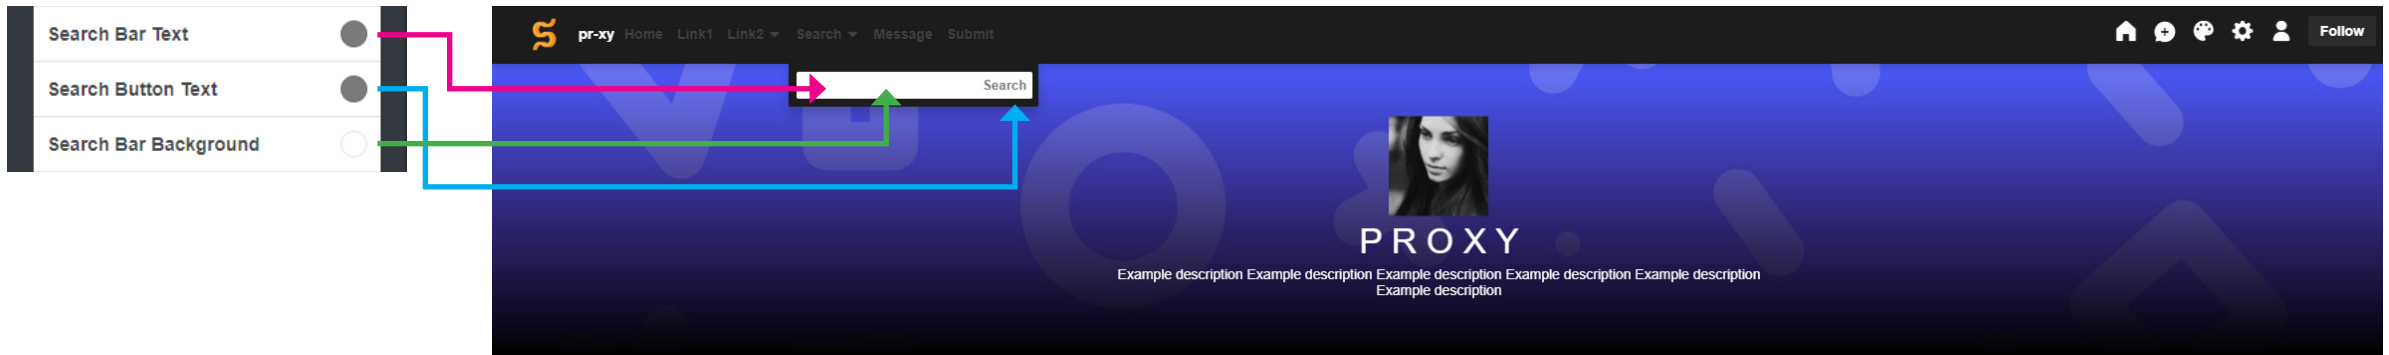

Pagination Selection Options

Pagination Type

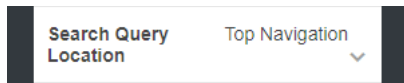

You can set numbered pagination or infinite scroll with the selection option below.

Search Query Colours

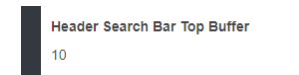

Search Query Selection Options

Search Query Location

This selection list contains 3 options. You can have the search bar presented as a navigation drop item like the above example, it can be placed on the header or on the sidebar.

Search Query Text Inputs

Header Search Bar Top Buffer

When using the search query on the header there may not be much of a gap between your description text and the search bar itself. Increasing the number here will put more space between the description and the search query.

Search Query Booleans

Enable Search Bar

This will fully enable or disable the search bar. It must be turned on if you want to see its position.
